Professional Summary

President of ICC Group, Inc. - a mid-market General Contractor concentrating in the heavy/highway category of civil construction with annual revenue approaching \$100M.

ICC self-performs many tasks within the industry including but not limited to pile driving and earth retention systems, structural steel erection, new bridge construction, rehabilitation of existing structures, complex concrete work, etc. In addition to owning a wide variety of land-based heavy construction equipment and cranes, ICC maintains a fleet of barges and tugboats for all types of marine construction.

Our client base includes federal, state and municipal governmental agencies. In addition to the public sector, we have successfully completed many projects for all Class 1 Railroads, Regional Short Lines, manufacturing and mining facilities such as Wedron Silica and transportation infrastructure and intermodal facilities for CenterPoint Properties.

Education

DePaul University – Chicago, IL. 1983
