

Table 1.  
Near-term Management & Maintenance Tasks for Naturalized Landscapes.

| Activity  | Frequency |         |             |           |        |             |        |                     |           |        |        |        | Schedule |        |   |   |   |   |   |   |   |   |   |   | Calendar |   |  |  |  |  |  |  |  |  |  |  |
|---|-----------|---------|-------------|-----------|--------|-------------|--------|---------------------|-----------|--------|--------|--------|----------|--------|---|---|---|---|---|---|---|---|---|---|----------|---|--|--|--|--|--|--|--|--|--|--|
|   | 2x/month  | Monthly | Other month | Quarterly | annual | Semi-annual | Annual | After major storms* | As needed | Year 1 | Year 2 | Year 3 | Year 4   | Year 5 | J | F | M | A | M | J | J | A | S | O | N        | D |  |  |  |  |  |  |  |  |  |  |
| <b>Debris/Litter Management</b><br>Remove trash (e.g., paper, plastic, brush, grass clippings, etc.) from inlet/outlet structures, basin slopes, and bottom and dispose in appropriate off-site location  |           |         |             |           |        |             |        |                     |           |        |        |        |          |        |   |   |   |   |   |   |   |   |   |   |          |   |  |  |  |  |  |  |  |  |  |  |
| <b>Stormwater Structure Management</b><br>Perform inspection of control structure(s) and clean-out/repair and dispose of debris in an appropriate off-site location.<br>Inspect basin/pond slopes and embankments.<br>Perform corrective maintenance any time the pond takes longer than design time to return to +6 inches of FWL.   |           |         |             |           |        |             |        |                     |           |        |        |        |          |        |   |   |   |   |   |   |   |   |   |   |          |   |  |  |  |  |  |  |  |  |  |  |
| <b>ESC Management</b><br>Maintain ESC devices in functional condition at all times and correct deficiencies immediately.<br>Conduct inspection within 24 hours of 1" storm event.<br>Repair damage to slopes/embankment, including undercut or eroded areas if 1.0 sq. m in size or 5 lin. ft. or 4 in x 4 in wide or greater.<br>Repair and revegetate eroded areas.   |           |         |             |           |        |             |        |                     |           |        |        |        |          |        |   |   |   |   |   |   |   |   |   |   |          |   |  |  |  |  |  |  |  |  |  |  |
| <b>Vegetation Management</b><br><i>General Weed Management</i><br>Control invasive non-invasive weeds as appropriate to each species. This may require different treatment times for different plant species. Treatment mechanisms may include mowing, hand cutting, prescribed burning, herbicide application, or a combination of methods. Species include but are not limited to the following:<br>Blackthorn<br>Thistles<br>Curtails<br>Common reed<br>Bush honeysuckle |           |         |             |           |        |             |        |                     |           |        |        |        |          |        |   |   |   |   |   |   |   |   |   |   |          |   |  |  |  |  |  |  |  |  |  |  |

| Activity   | Frequency |         |                   |           |             |        |                     |           |        |        |        |        | Calendar |   |   |   |   |   |   |   |   |   |   |   |   |  |
|--|-----------|---------|-------------------|-----------|-------------|--------|---------------------|-----------|--------|--------|--------|--------|----------|---|---|---|---|---|---|---|---|---|---|---|---|--|
|  | 2x/month  | Monthly | Every other month | Quarterly | Semi-annual | Annual | After major storms* | As needed | Year 1 | Year 2 | Year 3 | Year 4 | Year 5   | J | F | M | A | M | J | J | A | S | O | N | D |  |
| Purple loosestrife   |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| Red canarygrass  |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| <b>Prescribed burning</b><br>Have a qualified burn contractor conduct prescribed burning as fuel and weather conditions allow. If conditions prevent burning, conduct a high mow the following growing season.                               |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| <b>Mowing</b><br>Conduct variable-height mowing to prevent weed seed production  |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| Conduct variable-height mowing to prevent weed seed production.  |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| Conduct single-season mow in place of prescribed burning.  |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| <b>Harvesting</b><br>Harvest wetland plants that have been choked out by sediment build up and dispose of at an appropriate off-site location.   |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| <b>Replanting</b><br>Replace/supplement wetland and upland vegetation to meet performance standards  |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| <b>Other Management Actions</b><br>Manage wildlife and control mosquitoes  |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| <b>Vegetation Monitoring</b><br><b>Installation and Establishment</b><br>Conduct routine vegetation monitoring for compliance with performance standards, note progress of vegetation development and presence and extent of invasive plants |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| <b>Reporting</b><br><b>Installation</b><br>Submit installation documentation within 10 days of completing landscape work.  |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| <b>Establishment</b><br>Prepare and submit to village an annual monitoring report.   |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
| Growing Season 1 March to 31 October<br>* Precipitation events > 1 inch within a 24-hour period  |           |         |                   |           |             |        |                     |           |        |        |        |        |          |   |   |   |   |   |   |   |   |   |   |   |   |  |
