PROFESSIONAL PLAN REVIEW, INSPECTION AND SUPPORT SERVICES ON AN AS NEEDED BASIS

BACKGROUND

The Village of Orland Park Development Services Department is responsible for the review, permitting and inspection of all building and development projects in the Village to ensure compliance with minimum housing, building and safety laws. The Development Services Department serves as the lead department for project reviews and coordinates with other applicable Village departments and agencies.

The Development Services Department completes approximately 4,000 permits with 3,000 building plan reviews and nearly 12,000 building inspections annually for residential, multi-family residential, commercial and industrial projects. Current plan review turn-around timeframes are two (2) weeks for minor projects and three (3) weeks for major projects from date of submittal (calendar days), with plan to improve response times by one week in each respective category. Village staff provides general front counter customer service answering customer inquiries, code questions, and general project submittals and building inspection requests.

Current plan reviews and building inspections are completed per the 2018 IBC, 2018 IRC, 2012 IFC, 2018 IMC, 2018 IPMC, NEC 2017, and the Illinois Plumbing Code Illinois Accessibility Code; all with local amendments. Building Inspectors currently assist Code Compliance Officers with code compliance cases related to hazardous, substandard and unpermitted building projects.

Periodically, the Village experiences increased project submittals and building inspection requests. An important goal of the department is to provide timely, efficient and effective service so the village has recognized a need for third-party assistance in plan review and building inspection services during these times.

In addition, the Building Department may have a need for additional Plans Examiners, Building Inspectors, a Building Official or Permit Technicians to assist at the Village Hall due to special circumstances.

The Village is seeking proposals from professional firms interested in providing plan review and building inspections services on an as-needed basis, and providing onsite staffing at the Village Hall should the need arise.

SCOPE OF SERVICES

Plan Review

Contractor will perform multi-disciplinary plan review services including, but not limited to, the following:

- a. Conduct initial plan review and all subsequent reviews for design integrity and code compliance with the adopted edition of the applicable Building Codes, Housing Laws, local amendments, ordinances and appendices as adopted by the Village within timeframes specified by the Village.
- b. Review plans for all types of fire protection systems, fire and life safety, and compliance with state and local hazardous materials regulations.
- c. Review structural calculations, soils reports, geotechnical, grading, onsite improvements, energy calculations/reports, disabled accessibility requirements, green building standards, Village adopted ordinances and policies, and other project related information provided by

- e. Coordinate the resolution of identified deficiencies with the applicant and Village. Upon request by the Village, shall attend any required meetings connected with the plan review or field inspection of the projects.
- f. The standard turnaround time for assigned plan reviews shall be ten (10) business days for initial review, and five (5) business days for re-checks. The Village may use its own employees and/or other independent Contractors to perform plan reviews in addition to any such work assigned to a Contractor. The volume of plan review is dependent upon economic conditions that are outside the control of the Village. Consequently, there is no guarantee provided as to the minimum or maximum volume of work that may be assigned to the Contractor within any given time period.
- i. In the course of the plan review process, the Contractor shall avoid situations involving an actual or potential conflict of interest, shall act as an agent and a deputy of the Building Division Director, and shall act in the interests of the Village and the citizens of Orland Park. Contractors shall provide no services for any private client within the incorporated boundaries of the Village during the contract period.
- j. Contractor shall have an appropriately trained staff member who shall review any assigned projects that have aspects related to disabled accessibility requirements.

Our team also uses Bluebeam Revu to review plans electronically, and all our Plan Reviewers are proficient with its use. Bluebeam Revu is used by 94% of top U.S. contractors, which helps us partner with the Village of Orland Park and still 'speak the same language' as the design firm. We can initiate a "Studio" session from anywhere in the world to join us and the Village to see what we are seeing and have a live discussion about the submitted plans.

Tab E
Project Plan Approach

Tab E — Project Plan Approach

With our range of Community Development Services, SAFEbuilt empowers communities to envision, plan and execute innovative solutions for nearly all municipal operational services. Our teams bring the skills and experience necessary to meet the Village of Orland Park needs of Inspection and Plan Review Services.

KEY BENEFITS

Inspection Services

Our inspection staff recognizes that an educational, informative approach is the most effective way to improve the building community's experience.

Building, Mechanical, Electrical and Plumbing Inspections

SAFEbuilt operations conducts building, mechanical, electrical, and plumbing inspections for building-related permits both on a full-time and a supplemental basis. Our inspections are based on your adopted codes, adopted amendments, as well as specific additional requirements from each municipality, throughout the various stages of construction. If selected, SAFEbuilt can provide a standard code transition to bring a municipality's codes current.

Plan Review Services

Our plan review professionals use the best practices to meet each municipality's service requirements, managing projects effectively and efficiently, completing all deliverables on-time and within budget. After plans are logged, the lead planner assigns plans to the appropriate examiner, he/she completes the review, and the completed review is returned to the municipality as outlined below:

- **Tracking** – Plans are logged into our database and tracked through our review process. Once entered, the plans are sent to the appropriate plans examiner.
- **Verification** – All information on each submittal is checked against the permit application for accuracy.
- **Corrections** – Plans are reviewed for compliance with all applicable federal, state and local regulations. Corrections are noted directly on the plans. Preliminary consultation with applicants is also available.
- **Communications** – Results are communicated to the applicant the same day. Any needed corrections are explained to the applicant in detail.

Examples of previous projects include high-rise buildings, casinos, regional shopping centers, hotels, resorts, hospitals, sports arenas, detention facilities, police stations, fire stations, city halls, libraries, schools, industrial facilities, hazardous occupancies, trash recycling, essential facilities, unreinforced masonry seismic upgrades, residential projects, tenant improvements, and remodels.

Same-Day Reviews

We easily handle same-day plan reviews for small construction projects such as driveways, patios, fences, sheds, additions and remodels, and detached garages.

Commercial, Multi-Family, Single-Family and MEP Plan Review

SAFEbuilt ensures submittals are properly coordinated and tracked by following an established internal plan check process in which each plan is entered into our database, processed and returned to the client on time. Our plan tracking procedures are designed to track each submittal throughout the review process and maintain accurate and comprehensive records for each submittal, verifying information shown on each permit application.

- Screening and logging each application to ensure timely routing to all plan reviewers.
- Reviewing submittals for compliance with all relevant Federal, State, and local requirements.
- Performing plan reviews in compliance with local, State, and Federal regulations and all codes and ordinances in effect.
- Providing a thorough review of design drawings and details for compliance.
- Assuring corrections are handled within established timeframes and as succinctly and clearly as possible.
- We will assist each applicant through the plan review process. All corrections are identified based on compliance with specified codes and regulations.
- Correction sheets for specific projects shall be forwarded to the Village along with a cover memo containing the following (at a minimum):
 - The date(s) plans were received and reviewed by SAFEbuilt.
 - The date(s) the applicant was notified of completed plan reviews.
 - The name and telephone number of the applicant.

We can receive plans from the Village or directly from the applicant by mail, FedEx, or electronic transmission. Our process is convenient for our client municipalities and for the designers and permit applicants we serve. All plans submitted to the Village will be analyzed for compliance according to an agreed timetable.

Fire Plan Review

SAFEbuilt offers specialized fire plan review. Staff review plans for a variety of structures, including new, existing, and altered buildings.

Our experts also provide an additional level of oversight for projects involving occupancies or uses that traditionally pose a high risk for occupants. Our team can cover occupancies such as:

- Assembly
- Educational
- Hazardous occupancies
- High-rise Buildings
- Institutional occupancies
- Storage occupancies

These types of reviews include compliance checks for fire safety systems, such as automatic sprinkler systems, fire alarm systems, and fire extinguishing systems for restaurant kitchens. Fire site plans, however, review compliance for fire site access and fire department operation/suppression needs.

Capabilities to Receive and Process Electronic Plans Submittals

SAFEbuilt strongly recommends using remote (electronic) plan review for its better time efficiency, its environmental impact benefits (e.g., paper, fuel, and carbon emissions), and its benefits to health by preventing person-to-person interaction during the pandemic. Furthermore, our capabilities to support multiple plan reviews simultaneously is unlimited. Our Team is proficient with using all of the industry standard electronic plan review systems currently available. The benefits of remote plan review include:

- Access to multi-disciplined plan reviewers
- Expedited plan review. No more complaints about turnaround times.
- Remote access & increased transparency.
- Remote and concurrent reviews

Plan Review Timeframe

The following table outlines SAFEbuilt's proposed plan review turnaround times for the Village:

Type of Project	Initial Check
Small Residential	7 business days
Large Residential	10 business days
Small Commercial	7 business days
Large Commercial	15 business days
Fire Related Review	7 business days
