SCOPE OF SERVICE

Period of Control: Bi-weekly visits mid-April through mid-October. Should the need for services arise prior to the start of the season, McCloud Aquatics will respond to your request as soon as possible (additional charges may apply).

Frequency: You will receive a site visit approximately every two weeks after initial service is started. Service is dictated by weather, boat access, dissolved oxygen levels and other growth-related conditions. A service report will be sent after each site visit. Photos can be provided upon request.

Herbicides/Algaecides: Our herbicide selection and the rates applied are dictated by the product label, species and extent of vegetation present, current and proposed water usage (i.e. used for irrigation, swimming, fishing, etc.) dissolved oxygen levels (no applications will be made when levels are below 5.0 ppm), other environmental conditions and our discretion, as there is an inherent risk of dissolved oxygen problems in waterbodies. All herbicides utilized are EPA registered, labeled for use in aquatic resources, and applied by licensed applicators. McCloud Aquatics will not be liable for clean-up or replacement of dead fish that could result from a decrease in dissolved oxygen.

Communication: McCloud Aquatics requires an on-site/off-site point of contact for communication purposes. McCloud Aquatics is always open to your questions or concerns and will provide factual answers to the point of contact(s) only. McCloud Aquatics will email a service report to the point of contact after each site visit. Our service report includes dissolved oxygen level, pH, water temperature, infestation(s), action taken, and water use restrictions, if applicable.

Vegetation categories below are NOT included in the Standard Pond/Lake Maintenance Program:

- Free Floating Plants, i.e., Duckweed*, Watermeal* (limited control)
- Floating Pondweed, i.e., American & IL Pondweeds
- Emerged Plants, i.e., Cattails, Arrowheads, American Lotus, Waterlily, Creeping Water Primrose
- Submerged Vegetation, i.e., Eelgrass*
- Terrestrial vegetation in rocky shoreline
- No physical removal is offered.

*Limited control is due to the genetic makeup of Duckweed, Watermeal, and Eelgrass, which can form a resistance to products used during treatment. It is also difficult to gain control due to the reintroduction through stormwater systems and waterfowl.

Our quotation is based on access to your lake/pond via our trailered boat and equipment, your current irrigation status, and reflects the entire cost of labor, equipment, chemical, insurance, state, and local licensing, NPDES permit, and guarantee. **(No guarantee for ponds with average depth less than 2 feet or no boat access).**

- B. Customer is responsible for passing information along to the appropriate parties on restrictions due to herbicide applications that is related to: Fish consumption, live-stock drinking, swimming, irrigation.
- C. Label will dictate which restrictions will apply. High winds, heavy rains, water temperature, dissolved oxygen levels will determine any and all applications.

- F. Fish kills must be reported with 24-48 hours to determine the "root" cause of the kill by calling 847-226-4718 for inspection and gathering of water parameters by McCloud Aquatics. If determined that the resultant fish kill was caused by our actions, McCloud Aquatics will remove and dispose of the fish collected and will replace only those game species at the time of stocking (spring and fall only), if requested. Fish replacement will be based only on the number of game species collected and not by the size. Exotic species and non-native game fish are excluded from replacement and or monetary reimbursement. Fish kills caused by acts of nature, weather, disease, bacteria, runoff, foul hooking, vandalism, pollution, turnover, or other events beyond our control, are not covered under the contract with McCloud Aquatics.
