Operating History

United Meters, Inc began in 2003 when Mike Rodosky and Doug Punke started this new business to concentrate only in the North and Central areas of Illinois as a Union Illinois Licensed Plumbing Contractor. Doug received his Illinois Journeyman Plumbers license in 1985 and founded Mazon Plumbing. While operating his residential / commercial plumbing business he started installing water meters for municipalities in 1987. Since that time, Mazon Plumbing has completed numerous water meter change-out projects including 14,000 meters in Berwyn, IL, as well as thousands of meters in the communities of Belvidere, Braidwood, Carbon Hill, Coal City, Lombard, Mazon, Park Forest, and Rock Island just to name a few. Mazon Plumbing's reputation led to a contract with Nicor Gas to replace their gas meters in the Chicago metro area and to date remains one of Nicor's premier meter installation contractors. In 2003 United Meters, Inc. was created to brand our commitment to the meter installation business. In 2020, Doug retired from the day-to-day operations and Mike became President of the Company. Since 2003 UMI has installed over 285,00 water meters in over 50 municipalities in Illinois. Doug Sr still is part owner and consultant for UMI.

United Meters, Inc offices and main shop are located in Morris, IL which is very close to the Village of Orland Park and many of our twenty-one licensed plumbers on staff live within 20 minutes from Orland Park. We feel that we can respond to an emergency call in Orland Park in 30-45 minutes if the need arises.

Qualifications

United Meters, Inc is an Illinois licensed plumbing contractor, License # 055-025928 and signatory member of UA Local 130 of the Chicago Plumbers Union. UMI has 20 Journeyman Licensed plumbers on staff who are well experience in all aspects of a water meter change-out project.

Michael P. Rodosky, President

Mike graduated in 1988 from Southern Illinois University with a degree in Economics. Mike has over 21 years' experience in the water meter industry and received his Illinois Journeyman Plumbers license in 2008. Mike meets with each municipality on a regular basis to ensure that the meter change-out project runs smoothly and efficiently from start to finish.

Douglas L. Punke, Jr, Director of Field Operations

Doug graduated in 2007 from Illinois State University with a degree in Business. Doug has been full-time at UMI since 2007 plus has worked in the water meter business all through high school and college as his retired Father, former President Douglas Punke, Sr., was a founding partner in UMI. Doug oversees all field operations for UMI as well as serving as UMI's Safety Officer. Doug coordinates and holds all monthly safety meetings as well as daily tailgate meetings.

Ken Johnson, Project Foreman

Ken is an Illinois licensed Journeymen Plumber and has been employed with UMI since the beginning in 2003. Ken has over 25 years' experience in the water meter business and takes on the role as foreman to our field crews. Ken deals with the day-to-day issues on the projects and communicates regularly with the Village's field personnel to ensure all problems or concerns are dealt with immediately.

James Collins, Project Foreman

James is an Illinois licensed Journeymen Plumber and has been employed with UMI since 2008. Like Ken, James also takes on the role as a foreman to our field crews. James also deals with the day-to-day issues on the projects and communicates regularly with the Village's field personnel to ensure all problems or concerns are dealt with immediately.

Candy Jones & Kaitlyn Snyder, Office Managers

Candy and Kaitlyn have 14 years & 8 years respectively of experience managing UMI's office and staff. They oversee a database for each meter project so that the flow of information to each city is detailed and accurate. Both supervise all of UMI's billing, payroll, appointment scheduling, and customer reporting. UMI's office staff is driven to provide our customers with the professional service they expect and deserve.

United Meters, Inc is very knowledgeable of the aspects involved for the Village's Water Billing Department during a meter replacement project. UMI is very sensitive to the data being collected and reported to the Village during this process and Candy Jones and Kaitlyn Snyder work directly with the Water Billing Department to ensure the data flows smoothly and accurately. UMI is very cognizant of the transitional process and will be available to respond to any issues immediately. Although we have had little experience with Innoprise, we have worked with many Harris Software Billing Systems and have set up many Mass Meter Replacement File (MMRF) reports to which the Village can import all the data. We have recently worked with over five Water Billing Software companies to develop a Meter Data Import file to import new/old meter data into their Billing Software. One of those Municipalities also converted the billing system from cubic feet to gallons, so we are sensitive to the flow of data. Some of those companies include Tyler Technologies MUNIS, Tyler Technologies New World, Harris Utilities Billing Software.

UMI's Real-Time Data Collection

United Meters, Inc utilizes our own web-based installation tracking and data site which we will give the Village's employees access to see all the data and pictures we collect at each site. The site is very easy to access and is recorded in real time. Our Plumbers/Installers will fill out the Village's "Service Order" form as well as record all the pertinent meter data on a tablet with a cell card that loads it real-time onto the website. UMI's Tablets also serve as the Sensus programmers utilizing the most up to Field Logic programming tool that Sensus has developed. The Village will have access to export all the data from the website to an excel file to see the status of the entire project. UMI will also run the Import/Export file from this data for the Village to download directly into the Harris Innoprise billing software. The best part of the website is the ability to pull up an address and click a link to view the pictures that the installer took of the old register reading, or even the picture of the programmer that confirms the meter and smartpoint are configured successfully with the Village reading system.

UMI's Proposed Schedule of Installation Work

United Meters, Inc's proposed installation schedule is based on a quantity of 19,330 meters as listed in the Bidder Price Sheet. Exhibit B of the bid package contains the installation zone maps of which the number of meters is not listed. From looking at the zone maps, UMI assumes zones 1,2,3,5, and 6 have approximately 3800 meters each and zone 4 looks smaller at about 300 – 500 meters. UMI would like to split the larger zones into two or three phases each and zone 4 as one phase totaling approximately 11 to 16 UMI Installation phases. UMI prefers each installation phase have between 1000-1600 customers because when a customer receives the first letter approximately 15% call right away to schedule an appointment and we want to be able to schedule ASAP instead of pushing the appointment out a week or so. Phases of 1000-1600 are more manageable especially when it gets to the Final Letter and the Village needs to get involved. UMI will move to the next phase when 70 – 80% of the current phase is completed. United Meters, Inc's TARGET COMPLETION DATE is September 30,2024 which will give us 23 Float Days until the Villages target completion date of 10/31/2024. Spreading the project out until September 2024 will also ease the Village's portion of any extra work associated with a project this size.

UMI will have 440 working weekdays assuming a start date of 1/8/2023 and completion date of 9/30/22. These days do not consider any Saturday work and UMI will be working at least two to three Saturdays per month with one to three plumbers per Saturday. At a minimum, UMI needs to install only 44 meters per weekday to accomplish our target date, but with Saturdays and extra manpower, we plan on finishing in August of 2024 or before. UMI will designate a minimum 6 Plumbers to this project and will complete between 50 and 75 meters per day or 250 to 400 per week with a crew of 6 Plumbers. Saturday work will add another 10 to 30 meters to that weekly total. UMI can increase that production with more plumbers if the Village desires. The calendars on the next two pages notes the dates highlighted in red that UMI will not be working.
