Summary

The National Citizen SurveyTM (The NCSTM) is a collaborative effort between National Research Center, Inc. (NRC) and the International City/County Management Association (ICMA). The survey and its administration are standardized to assure high quality research methods and directly comparable results across The NCS communities. The NCS captures residents' opinions within the three pillars of a community (Community Characteristics, Governance and Participation) across eight central facets of community (Safety, Mobility, Natural Environment, Built Environment, Economy, Recreation and Wellness, Education and Enrichment and Community Engagement). This report discusses trends over time, comparing the 2014 ratings for the Village of Orland Park to its previous survey results in 2012. Additional reports and technical appendices are available under separate cover.

Trend data for Orland Park represent important comparison data and should be examined for improvements or declines. Deviations from stable trends over time, especially, represent opportunities for understanding how local policies, programs or public information may have affected residents' opinions.

Meaningful differences between survey years have been noted within the following tables as being "higher" or "lower" if the differences are greater than three percentage points between the 2012 and 2014 surveys, otherwise the comparison between 2012 and 2014 are noted as being "similar."

Overall, ratings in Orland Park for 2014 generally remained stable. Of the 89 items for which comparisons were available, 60 items were rated similarly in 2012 and 2014, 7 items showed a decrease in ratings and 22 showed an increase in ratings. Notable trends over time included the following:

- Most of the General Community Characteristics remained stable over time, however ratings for the overall image and overall appearance of Orland Park increased in 2014 when compared to 2012.
- Most facets of Community Characteristics remained stable between 2012 and 2014. Increases in ratings were
 in the area of Mobility with travel by car and traffic flow in Orland Park both showing improvement from
 2012. Within Natural Environment, ratings for the quality of the overall natural environment increased.
- In the area of Governance, Orland Park saw increases in the overall direction of Orland Park and the job the Village does in welcoming citizen involvement.
- Participation saw increases in the likelihood of respondents to remain in Orland Park and to recommend Orland Park as a place to live.

Note that the tables include benchmark comparisons for all survey years. In 2012, a smaller margin of error (MOE) was used for comparisons to other communities versus a larger margin of error in 2014. To aid in interpreting the relative benchmark change from 2012 to 2014, an additional 2014 column has been included, with a smaller margin of error (analogous to 2012). All of the interpretation in the set of 2014 reports is based on the larger margin of error.

Table 1: Community Characteristics General

	Percent rating positivel	y (e.g., excellent/good)			Comparison to benchmark	
	2012	2014	2014 rating compared to 2012 2	2012 (+/-2 points MOE)	2014 (+/-2 points MOE)	2014 (+/-10 points MOE)
