See page 2 for further vinly descriptions

EXISTING DESIGN

High-Performance Vehicle Graphics with Long-Lasting Gloss Protection

- High-end vinyl material used for professional police and fleet graphics
- Removable 7 mil flexible retroreflective film with enclosed lens construction for high visibility
- Slideable, pressure-activated adhesive with air release channels for easy, bubble-free installation
- Excellent angularity for visibility from multiple viewing angles
- Up to 9 years durability under normal conditions
- White film with a typical coefficient of retroreflection of 100
- Suitable for commercial vehicles, rail and bus graphics, signage, and striping
- Compatible with solvent inkjet printing for high-quality output
- Meets applicable ASTM and NFPA safety and performance standards
- Protected with 3M™ Scotchcal™ Gloss Overlaminates 8518 for enhanced durability and appearance
- Overlaminates provide a high-gloss “wet paint” look with strong sunlight reflection
- Resists fuel vapors and environmental exposure
- Offers long-term UV protection and added physical durability
- Recommended for various applications including car and boat wraps
