ADDENDUM NO. 1

**BID #15-019 STELLWAGEN FARMHOUSE RESTORATION:
PHASE 1 EXTERIOR FOUNDATION**

Date: Monday, July 27, 2015
To: All Potential Proposers
From: Village of Orland Park
RE: Responses to Questions Received

This Addendum No. 1 is being issued to provide responses to questions submitted for the above mentioned Project. All other provisions and requirements of the ITB shall remain in effect. **All addenda must be acknowledged by signing the Addendum and including it with your submittal.** Failure to include a signed formal Addendum with your submittal may deem the submittal non-responsive; provided, however, that the Village may waive this requirement if in its best interest.

The following are the Village's responses to questions submitted for this ITB:

1. Question: Is there a known Septic field and Is it Operational?

Village Response: *Yes. It is located to the east of the farmhouse building.*

2. Question: For exterior wall repairs what depth would the repairs go to? sub grade? 3 feet? to basement floor elevation?

Village Response: *The repointing and repair project is mainly concerned with the exposed and visible foundation. The parts of the foundation that become exposed due to regrading (i.e. for drainage) should be addressed by this project. Therefore, the excavation should be reasonable, and the repair work based on final grades. Specifics: excavate 12 inches below window openings with 6 inches of pea gravel installed. At the basement entrance excavate minimum 2 feet out from walls to a depth 16 inches below the level of basement floor to accommodate repairs.*

After excavation, re-evaluate exposure and repoint/ seal as necessary on limestone, CMU and poured concrete foundation.

3. **Question:** If there is excess dirt after regrading can this dirt be kept on site?

Village Response: Yes. Excess dirt may be piled on site as determined by the Parks and Building Maintenance Department, which will monitor the project. Any stockpiling shall be seeded. Proper erosion control measures shall be required.

4. **Question:** Drain tiles for gutter down spouts to be run to 108 th st ditch?

Village Response: No. Drain tiles shall be directed southward away from the building toward the low points south of the farmstead and on the farm property.

5. **Question:** Does the landscaping around the perimeter of the house need to be preserved or replaced?

Village Response: No. Landscaping does not need to be preserved or replaced at this time. At a minimum, when work is complete, grass shall be planted to cover exposed dirt.

6. **Question:** will seed and blanket be necessary where there is bare dirt?

Village Response: Yes. See response to Question 5.

7. **Question:** Is there a preferred method for repairing cracks in the poured concrete footing?

Village Response: Typical crack repair for the poured concrete is acceptable. Sealants are an important part of maintenance of historic concrete structures. Elastomeric sealants may be used to seal cracks and joints to keep out moisture and reduce air infiltration. Where used for crack repairs, the finished appearance of the sealant application must be considered. Depending on the extent and final appearance, sand may be broadcast onto the surface of the sealant to help conceal the repair.

8. **Question:** Is there a Preferred grout or Mortar to use for repairs to the Limestone wall?

Village Response: The grout/mortar should be of historical mixture and application to the limestone portion of the foundation. It should match as close as possible. The profile of the grout/mortar application will have to be determined based on the current historic grout/mortar evident on the foundation wall or through historic pictures.

9. Question: Window in the footing on the East wall was boarded up. Does this window need to be replaced or does the opening get filled with concrete?

Village Response: No. This is a plumbing access port for the house's bathroom. No replacement or filling with concrete is necessary at this location.

10. Question: Window in the footing on south side seems to be rusted and may not be repairable. Should this window be replaced if irreparable? and if so from what source?

Village Response: Yes. If repair is not possible, the window and its constituent parts shall be replaced/ reconstructed according to the historic and original design to preserve the appearance. Salvaged materials from other locations may be necessary and appropriate.

11. Question: Are there any permit requirements for this work and if so will that cost be paid for by the village?

Village Response: Permits are required for this project; however projects undertaken by the Village do not pay permit fees. The contractor will be responsible for obtaining permits and being licensed and bonded to work in the Village of Orland Park.

12. Question: Is there an estimated project cost for this project?

Village Response: The Village does not release cost estimates while bids are in progress.

The question and answer period for this bid is closed. The bid submission deadline remains Friday, July 31, 2015 not later than 11:00 A.M.

Contractors are required to acknowledge receipt of any formal Addendum by signing the Addendum and including it with the bid submission.
