 The Illinois Prevailing Wage Act (820 ILCS 130/01, et seq.) does apply to this Contract.

This Contract calls for the construction of a “public work”, within the meaning of the Illinois Prevailing Wage Act, 820 ILCS 130/01, et seq. (“the Act”). The Act requires contractors and subcontractors to pay laborers, workers and mechanics performing services on public works projects no less than the current “prevailing rate of wages” (hourly cash wages plus amount for fringe benefits) in the county where the work is performed. The Illinois Department of Labor (“IDOL”) publishes the prevailing wage rates on its website at <http://labor.illinois.gov/>. The IDOL may revise the prevailing wage rates from time to time and the contractor/subcontractor has an obligation to check the IDOL’s website for revisions to prevailing wage rates and comply with the most current prevailing wage rates. For information regarding current prevailing wage rates, please refer to the IDOL website. All contractors and subcontractors rendering services under this contract must comply with all requirements of the Act, including but not limited to, all wage requirements and notice and record keeping duties, including but not limited to each contractor and subcontractor who participates in public works to file with the Illinois Department of Labor (IDOL) certified payroll for those calendar months during which work on a public works project has occurred. The Act requires certified payroll to be filed with IDOL no later than the 15th day of each calendar month for the immediately preceding month through the Illinois Prevailing Wage Portal—an electronic database IDOL has established for collecting and retaining certified payroll. The Portal may be accessed using this link: <https://www2.illinois.gov/idol/Laws-Rules/CONMED/Pages/Prevailing-Wage-Portal.aspx>. The Village reserves the right to withhold payment due to Contractor until Contractor and its subcontractors display compliance with this provision of the Act. The Contractor shall also pay prevailing wages at rates not less than those prevailing under Davis-Bacon Wage Act Provisions as determined by the U.S. Department of Labor to all laborers, workmen and mechanics performing work under this Contract, if such Act is applicable, and, in such event, the more restrictive (i.e., higher) prevailing wage requirements shall be applicable.

3.0 TECHNICAL PROPOSAL
(Reference: Exhibit A Project Specifications, Requirements, Page 3,
and RFP, Technical Proposal Requirements, Pages 6 and 7)

3.1 Description of Proposal

The scope of work described below is detailed to meet the scope of work entailed in the Request for Proposal and does not contain any deviations or assumptions.

Adesta will provide all labor and materials for the placement of duct, fiber, and fiber terminations from the hand hole (HH) located at the corner of West Ave and Ravina to the Police Training Facility (PTF) located on 163rd Place in Orland Park IL. The following listed methods and materials will be utilized.

One of the existing conduits owned by the Village of Orland Park (VOP) will be rodded to assure the pathway is free of obstructions and or damaged conduit and equipped with mule tape for the placement of three 1.25-inch HDPE conduits. This process will be performed from the HH located at the intersection of West Ave and Ravinia heading south to 159th Street, crossing 159th Street and heading West to the HH located at the corner of 159th Street and 104th Avenue. The total approximate distance is 4,785 feet. (If it is determined that an obstruction is preventing the placement of the three 1.25-inch HDPE, Adesta will contact the VOP to discuss solutions and a mutually agreed upon change request.) Once the conduit path has been cleared and equipped with mule tape, Adesta shall then place Three 1.25-inch HDPE conduits in the cleared pathway listed above.

The next phase will be the creation of a pathway from the HH located at the corner of 104th avenue to the corner of 104th Ave and 163rd Place and heading west down 163rd Place into a HH at the PTF to be provided by Adesta. The HH at the PTF will be placed approximately 180 feet west from the power utility easement and approximately 70 feet out from the PTF and into the basement of the PTF. Adesta shall place two 1.25-inch HDPE ducts and tracer wire. The total approximate footage is 4,480 feet.

A 24-count loose tube fiber will be placed from the HH at West Ave and Ravinia to the HH located at 159th & Ravinia with 50-foot slack coils placed in each HH. The fiber will continue west down 159th Street to a HH located at corner of 159th Street and 104th Ave where another 50-foot coil will be placed. The total approximate placement of fiber will be 4.935 feet.

A 12-count loose tube fiber Will be placed from the HH at 104th Ave and 159th Street to the Adesta proposed HH recommended to be placed at in the SW corner of 104th Ave and 163rd Place where a 50-foot maintenance coil will be placed and continue down 163rd Place to the HH located in front of the PTF and into the basement of the PTF where a 50-foot splice coil will be left. The total fiber placement footage is approximately 4,630 feet.

A rack mount LC Type 12 Fiber termination panel (FTP) containing a 200-foot tail will be placed inside the PTF. The tail of the FTP will be placed through the building to the entry point of the exterior 12-count fiber cable.

Adesta will provide an outdoor sealed splice case equipped with splicing trays and fusion splice and test two fibers from the existing VOP 24-count fiber into the newly placed 24-count fiber at the HH of West Ave and Ravinia. A second outdoor sealed splice case equipped with trays will be placed in the HH located at 159th Street and 104th Ave. Adesta will fusion splice and test two fibers at this location. A splice panel will be mounted in the basement of the PTF where the two fibers in the 12-Fiber cable will be spliced into the FTP tail will be fusion spliced and tested.

Option 1:

The following is a summation of work to be provided in Option 1. The scope of work listed below does not contain any deviations or assumptions and is detailed to meet the scope of work entailed in the request for proposal.

Adesta will provide all labor and materials for the placement of duct, fiber, and fiber terminations from the HH located at the corner of 104th Ave to the VOP Sportsplex located at 11351 W. 159th Street. All methods and procedures listed in the base project will be utilized in Option 1.

Rod and Rope existing VOP conduit starting in the HH at the corner of 104th Ave and 159th Street to HH at 159th Street and 113th Court. The length is approximately 6,150 feet. Three 1.25-inch ducts will be placed inside the existing VOP conduit system from the HH at 104th Ave and 159th Street along 159th Street heading west to a HH located at 159th Street and 113th Court.

Pathway will be created utilizing directional boring to place two 1.25-inch HDPE conduits and tracer wire from the HH located at 159th Street and 113th Ave heading approximately 50 feet west before turning south down the east side of 113th Court to the corner nearest the complex entrance behind the Q Restaurant approximately 285 feet. The duct will then head SW through the parking lot islands to the soft ground outside of the Sportsplex approximately 395 feet where a HH will be installed by Adesta before heading south into the building approximately 20 feet. Adesta to remove and restore the sidewalk section approximately 15-feet by 15-feet for the duct placement up to the building. Adesta will then core drill into the building approximately 30 inches above ground and place a 24-inch by 24-inch building-mounted pull box where the two 1.25-inch HDPE ducts and tracer wire will be terminated. The pull box will be placed on the structure with the bottom of the box being located approximately 24 inches above the grade. The total conduit installation is approximately 750 feet. If stitch boring is required, all pits will be in the parking lot islands.

A 12-count loose tube fiber cable will be placed with a splice loop starting the HH located at the Corner of 104th Ave and 159th Street to a HH located at the corner of 159th Street and 113th Court where a maintenance coil will be placed then continue into the interior of the Sportsplex where the fiber will enter the building from the building mounted pull box into an LB and 10 feet of EMT into the drop ceiling where a splice loop will be placed. The approximate total of 12-count fiber placement will be 7,100 feet.

Two fibers from the existing VOP 24-count fiber will be spliced into the new 24-count fiber placed by Adesta at the HH located at West Ave and South Ravinia. Two fibers from the 24-count fiber will be spliced into the 12-count fiber will be fusion spliced and tested into the splice case placed in the HH located at 104th AVE and 159th ST. A third splice will be performed in the drop ceiling of the Sportsplex where an indoor movable splice case and trays will be provided by Adesta. Two fibers from the exterior fiber will be spliced into a rack mount LC type fiber termination panel containing a 200-foot tail that will be pulled from the equipment room above the drop ceiling utilizing J hooks to be placed every 5 feet to the splice case placed above the drop ceiling where two fibers from the FTP tail will be fusion spliced into the exterior 12-count fiber. The splice case will be mounted so that the terminal may be removed and brought to the interior ground for splicing and maintenance.

Experience and Project Examples

Adesta, a fully owned division of Allied Universal, is a systems integrator that has been providing and maintaining private fiber optic networks for 30+ years. Examples of our large-scale fiber projects in the State of Illinois include:

- **The Illinois State Toll Highway Authority (ISTHA)**
Adesta designed, built, and integrated a 276-mile fiber optic network for the authority. Because the authority's long-term plans required a broad range of computer and communications technologies, Adesta designed the network to support a host of applications. The network allows the authority to enhance communications and meet the needs of its I-Pass[®] program, which includes electronic toll collection, video enforcement, and a traffic information system. Additional benefits are lower communications costs and improved customer service. Because of a demand for more ducts, Adesta entered into a second contract with ISTHA for an additional 180-mile network known as the overbuild. Adesta continues to manage and make updates to the network today.
- **ComEd (Commonwealth Edison)**
Commonwealth Edison Company (ComEd) is the largest electric utility in Illinois, serving the Chicago and Northern Illinois area. Faced with growing bandwidth requirements and competition from independent power producers, ComEd hired Adesta to provide the design, engineering, and construction of a 630-mile fiber optic network, with a backbone that included additional dark fiber, to support future applications. The network enables ComEd to meet the internal demands for increasing voice, data, image, and video communications, and Adesta continues to manage the network today.

- **Village of Orland Park**

Adesta provided a complete solution for Village of Orland Park in 2017 to provide a dark fiber network for both the Village offices and the Consolidated High School District 230. Operating under the name G4S, Adesta provided the design, construction, implementation and turnup of a 10-location dark fiber buildout. Adesta continues to do as-needed maintenance on the Orland Park dark fiber to this day.

3.7 Operating History

Adesta has been operational since 1988, designing and deploying outside plant fiber networks, including existing conduit systems, new buried construction, and aerial construction. Throughout our history, we have deployed over two and a half million fiber miles in more than 200 metropolitan and rural areas for telecom carriers, independent telephone companies, healthcare systems, municipalities, utilities, and DOTs. Our local office has an experienced team of project managers, designers, technicians, administrative support, and subcontractors with the capability and capacity to complete this project.

The company was initially founded as Kiewit Network Technology which became MFS Network Technology and eventually Adesta LLC before being acquired by G4S in 2009. In 2017 G4S reestablished the Adesta name, as a wholly owned subsidiary, to maintain focus on its telecommunications business. In 2021 Allied Universal Services (AUS) of Irving, California acquired G4S globally. Adesta, now a subsidiary of Allied Universal Technology Services, the technology integration arm of AUS, remains focused on telecommunications systems design, construction, operations, and maintenance of dark fiber networks, and utility locating services. AUS has approximately 800,000 employees worldwide and revenues of about \$20B annually providing a solid stable financial footing to support Adesta.

..Title

Fiber Build to Police Training Facility - RFP 24-035

History

On February 29, 2024 the Village issued Request for Proposal (RFP) 24-035 "Fiber Build to Police Training Facility" requesting proposals from qualified contractors for the construction Fiber Build to the Police Department Training Facility 10609 163rd Place, Orland Park, IL 60462. In addition, an alternate was included in the bid to extend fiber to the Sportsplex at 11351 W. 159th Street, Orland Park, IL 60467.

During the four (4) weeks that the bid was open for review, forty-four (44) firms

downloaded either partial or complete bid packages. RFP 24-035 was closed on March 28, 2024, at which point four (4) firms submitted proposals. Of the four proposals submitted, one proposal did not include all required equipment to be considered an acceptable bid and has been excluded. All remaining qualifying proposal packages and an audit of the proposal submittals are attached for reference. A summary of the proposal prices is provided below:

* Henkels and McCoy Inc.- Base Bid - \$133,000, Optional Bid - \$54,850.00, Total Bid - \$187,850

* Adesta LLC - Base Bid - \$144,677.36, Optional Bid - \$104,097.57, Total Bid - \$248,774.93

* Pirtano Construction LLC- Base Bid - \$214,596.50, Optional Bid - \$109,714.55, Total Bid - \$324,311.05

Henkels and McCoy Inc. ("H&M"), who submitted the lowest proposal price, provided a Client Portfolio which was reviewed by DoIT. H&M demonstrated evidence of having successfully completed projects of much larger scale throughout Chicagoland and the Midwest including fiber builds for Verizon, ComEd and Bloomingdale Communications. There are a number of exemptions on the H&M that are not present on the other bids (see bid documents).

The Village has extensive experience working with the second lowest bidder, Adesta. Adesta has completed multiple fiber projects throughout the Village and has also worked with the local school districts on their fiber builds.

The Village has no experience working with either Pirtano Construction or H&M.

The Director of Information Technology, Tad Spencer, presented the recommendation of awarding Adesta LLC the fiber build project for \$144,677.36 and include the optional Sportsplex Bid for \$104,097.57 for a bid total of - \$248,774.93. The Technology Commission voted to modify the recommendation and removed the alternate bid. The Technology Commission then approved the modified recommendation to award the bid to Adesta to complete the fiber build to the Police Training Facility for \$144,677.26

Financial Impact

Funding for the Fiber build to the Police training facility was budgeted in the 2024 Budget split between Capital account 3008010-570100 in the amount of \$50,000.00 and 3000000-5704 in the amount of \$100,000.

Recommended Action/Motion

I move to approve awarding RFP 24-034 Fiber Build to Police Training Facility Project to Adesta for a total contract price not to exceed \$150,464 (\$144,677.36 plus a 4% contingency of \$5,787);

AND

Authorize the Village Manager to execute all related contracts, subject to Village Attorney review;

AND

Authorize the Village Manager to approve change orders not to exceed the contingency amount.
