JULY 4, 2016-2018

Services

For generations, Melrose Pyrotechnics has been creating celebrations for loyal audiences everywhere. Melrose Pyrotechnics is the place technology meets tradition. We deliver an unparalleled brand of passion plus talent, powered by the best and brightest in fireworks techniques.

► Traditional Displays

Whether you are planning a Fourth of July celebration, wedding reception, company party, or anything in between, you can be assured that Melrose Pyrotechnics will provide you with a fireworks display that will fit your budget and surpass your expectations.

When it comes to traditional fireworks displays, Melrose Pyrotechnics is second-to-none. From your first meeting with our event producers to your display's grand finale, our team of professionals will be with you every step of the way.

Every Melrose Pyrotechnics display is customized and individually designed for your event. We hand-select each pyrotechnic device that we use in your program, which allows us to create and present customized scenes of color and special effects throughout your entire display.

Our commitment to you and your show is unprecedented in the fireworks industry, and it doesn't end with the fireworks display. We personally ensure that all ancillary details prior to and after the show are addressed in a professional manner.

► Sports Entertainment

Whether it's celebrating team introductions, opening ceremonies, delivery of the National Anthem, a stunning achievement, or the culmination of a high-powered sporting event, a fireworks production is the extra dimension that sends crowds into ecstasy.

Fireworks in the arena, fireworks night at the stadium, and fireworks in the ballpark rank among our most high-demand venues. Major sports leagues around the nation, including the NFL, MLB, NBA, Nascar, and NCAA, call on Melrose to deliver the celebration factor like no one else can.

► Pyromusical Displays

While many companies can turn on music and shoot off shells, it's rare to discover the kind of synergy that fuses musical production with technical artistry to build a full-blown pyromusical event. With the latest in computer scripting software, Melrose completely designs and synchronizes your show before it ever leaves our facilities.

Our soundtrack artist is a versatile music aficionado, ready to listen to your tastes and custom-build a show around your theme. Our choreographers specify the perfect companion effects and timing to build entertainment that defies imagination. Our state-of-the-art production studios offer broadcast-quality, digitally edited soundtracks. Once music is selected, a Melrose display choreographer fuses fireworks with the soundtrack using computer design software to achieve incredible precision and split-second timing.

Through a collaborative development process, we follow your lead, offer creative direction, and provide fully detailed previews and soundtracks for your feedback as we lead up to the show. We choreograph every sound and shell to create the look and feel you envision for your spectators.

► Indoor Pyrotechnics/Special Effects

From indoor sporting events to concert stages, Melrose excels in producing indoor pyrotechnic shows. We rev up the excitement with our diverse inventory of gerbs, fountains, mines, line rockets, and other specialized effects. In addition to indoor pyrotechnics, we offer a wide array of specialized indoor services including confetti, streamers, and cryogenic effects.

Melrose producers will work closely with you to decide if indoor fireworks will work for your application, and if so, how to deliver the highest possible impact. Depending on your specific needs, let us create the perfect experience for your event! It takes a special level of skill to adapt technology for a stunning indoor show, and we're up for it.

Safety

Melrose Pyrotechnics has always made it a priority to actively promote and pursue ongoing education and safety training. Melrose has raised the bar for the industry with our in-house training facility, where we provide ongoing hands-on demonstrations and lectures in order to ensure all personnel and employees are always educated to the highest standards possible.

Our training program implements standards and curriculum that we developed in collaboration with the American Pyrotechnics Association (APA) in order to foster operator and technician safety throughout the industry. In addition to APA training, Melrose educates and abides by safety protocols set forth by the United States Department of Transportation. We also recognize, follow, and exceed the guidelines laid out by the National Fire Protection Association (NFPA) in their annual NFPA handbooks.

► American Pyrotechnics Association

The APA is the largest professional trade organization in the pyrotechnics industry. Maintaining a long-time membership in the APA, we share the same values as the APA in the importance of promoting safer regulations and continuing education throughout the fireworks industry. Through annual conventions and industry-wide forums, Melrose continues to have an important voice in the development and advancement of APA safety standards and training curriculum.

► American Fireworks Standards Laboratory

Melrose Pyrotechnics continues to work with the American Fireworks Standard Laboratory (AFSL) in an effort to implement and improve upon internationally adopted safety standards and testing procedures. The AFSL works directly with manufacturers and import firms to ensure that products have been tested for safety and meet the quality standards developed by the AFSL. It is this relationship that has helped Melrose Pyrotechnics develop their product quality standards. In the future these policies will promote safer products that will be used throughout the fireworks industry.

► National Fire Protection Association

The National Fire Protection Association (NFPA) establishes guidelines to promote safety in the fireworks industry. At Melrose, no design work is started until we have confirmed your show site will meet NFPA guidelines and any additional internal guidelines to promote safety. NFPA's guidelines are the same standards that our insurance company uses to confirm that your show is meeting safety requirements.

► United States Department of Transportation

Melrose Pyrotechnics educates all employees on the rules and regulations set out by the United States Department of Transportation (USDOT). USDOT's guidelines are formed to ensure safe handling and transportation of product from our facilities to your shoot site. You can have peace of mind that the driver transporting product to your show will be well educated on the rules and regulations established by the USDOT.

When it comes to safety and training, Melrose has raised the bar for the industry with its on-site training facility and full-time staff member dedicated exclusively to training. The curriculum developed at Melrose expands on the curriculum of the American Pyrotechnics Association. With a maximum class size of 12, Melrose invests thousands of hours of training into development of its expert team every year.

Fireworks

Melrose Pyrotechnics is serious about the products we use at your event. Starting with the manufacturers, we purchase product only from companies that are as dedicated to safety and quality as we are. Melrose travels the globe annually searching for the most unique and exotic products to add to our inventory.

Through extensive testing, we collect a wealth of information on every pyrotechnic device we employ. With the most diverse inventory in the United States, Melrose has the product to set your show apart from the rest. With all of our planning, attention to detail, and execution, Melrose is confident that your show will be the one everyone remembers year after year, applause after applause.

► Manufacturers

In order to maintain a diverse collection of specialized products, our inventory devices are designed and manufactured all around the world, including the United States, Italy, Spain, Germany, China, Japan, and Australia.

It's the personal relationships formed over the years that make Melrose confident in who we are buying from and how the products are going to perform. It is this effort that results in the breathtaking effects that light up the night sky.

► Testing

Melrose Pyrotechnics is serious about product evaluation and testing. As soon as new products arrive at our facility, we unpack and immediately inspect them. Once we are satisfied with the quality of the product, our thorough evaluation process begins.

We begin by computer-firing, recording video of, and collecting data about each product as our entire creative department watches closely and evaluates each effect. Criteria such as flight time, effect duration, debris rating, and performance give us a wealth of information that we use while designing your display.

Flight time tells us the time span between the moment a shell is fired and the moment it becomes visible in the sky.

Effect duration is the period of time that the effect is visible to the audience.

Debris rating is a measure of the cleanliness of a shell's break.

Performance is an objective grade given by our experts to make sure it meets our quality standards.

We apply the evaluation data in the design of every Melrose Pyrotechnics display, allowing us to utilize every product to its full performance potential.

► Inventory

Melrose Pyrotechnics has one of the largest inventories of fireworks in the United States—and possibly the world. Melrose's facilities are truly second to none with over 100,000 sq. ft. of Type 1 explosive storage.

Refreshing 25% of our product every year means that we will always have the newest, most innovative, and creative options the industry has to offer. This huge selection of products gives our designers the creative advantage to take your show to the next level!

► Show Design

Once the testing of the product is complete, it's time for the design team to lead the way. With your audience and site parameters in mind, the design team creates impact and emotion utilizing the vast array of products with layers of color in the sky. In addition to our consideration of evaluation data, the designers' choices of when and how to use a particular product versus another is based on many factors. These include effect characteristics, color range, rhythm, and tempo. Pyromusical displays allow us to take our creativity to the next level by marrying fireworks to the tempo, feel, dynamics, and emotional peaks and valleys that comprise a great soundtrack. The designers at Melrose Pyrotechnics are true artists and they love what they do!

Program

Display Content

The opening song has high impact and sets the mood for the rest of the program. The exact type and style of shells will depend on the music selected. This will allow us to choose the best possible effect that corresponds to the tempo and mood of the music.

There isn't a true opening in a pyromusical display. The beginning of the show is a part of the entire display. Barrages normally refer to low level multi-shot boxes that wouldn't be used in your display, because of the minimum height that your requesting for the aerial shells.

The main body of the display will be 21-23 minutes. The finale will be approximately 2 minutes in length. We'd follow this format over the course of the contract.

The section of our proposal titled Show Design will explain music synchronization.
