Jeff,

Below is your pricing for the LED roadways we discussed on Friday.

GE 150 watt replacement — **ERL1-0-08-E1-40-D-GRAY-AGILR** — \$274.75 each  
GE 250 watt replacement — **ERLH-0-11-F1-40-D-GRAY-AGILR** — \$355.50 each

Also, as we discussed, these fixtures will be eligible for rebates from the State of Illinois. The 150 watt replacements are currently eligible for a \$130 rebate per fixture and the 250 watt replacements are currently eligible for a \$243 rebate per fixture. These rebates are currently above what is consider a “normal” rebate because the State has a bonus going on for LED roadway conversions. I can handle all of the rebate paperwork for you.

Please let me know if you have any questions.
