Attention: Dennis Wokurka

Reference: Cleaver Brooks Boiler Repair

Dear Mr. Wokurka:

We are quoting the repair of the CLEAVER BROOKS boiler at the facility above. Our scope of work will be as follows.

1. We will remove the casing from the east side of the boiler.
2. We will pad weld a pin hole leak that is located about the 4th tube in from the rear using our certified welders.
3. We will hydro test the boiler just under the safety valve settings.
4. Upon a good hydro we will install new millboard refractory to both sides of the boiler and continue to reinstall both sides of casing.
5. We will remove all debris resulting from our work.

We can do the work described working Monday through Friday during normal hours for the cost of \$5,294.00.

We look forward to working with you on this project any questions please contact the office.

Very truly yours,

Rob Taylor
