

Agenda Initiative for the Committee of the Whole Meeting

and

Board of Trustees Meeting

Board meeting February 2, 2026

I put forward a motion to recommend that the Board of Trustees appoint a committee to investigate the potential ethics breach involved with the Amazon development approvals.

A premature announcement appeared on the website of Inform Orland Park – PAC on or about January 2, 2026. The Plan Commission meeting, including time for public comment, was held subsequently on January 6, 2026.

The posting being premature was harmful; not to be overlooked is the implication of having the announcement on a political website whose chairperson is a member of the Plan Commission.

The appearance of impartiality and fairness is the core of upholding the public confidence in government.

A full investigation of the cause of the announcement and full list of those involved should be developed by an independent committee. The committee could also recommend penalties and sanctions at their discretion.
