Since 2006 Pipe View has provided pipeline inspections based on engineering principals with real time communication. Over the last 18 seasons Pipe View America has been successfully completing sewer inspections and documentation for municipalites and utility owners across the country. We have offices in Chicago, IL, Azle TX, Greely, CO, and Columbia, MO. Our teams utilize NASSCO Certified operators and the most current equipment for our mainline, lateral launch, push camera, hydro-excavation, sewer repair, sewer cleaning, and live gas main inspection operations.

We provide our clients with GIS output that is customizable to directly upload into their system. This has also provided daily progress updates to inspectors and managers. Inspectors also have direct access to completed videos and reports online, typically within 48 hours.

We look forward to the opportunity to work with the Village of Orland Park and begin a successful relationship.

Respectfully,

Tony Barger

Equipment to be used on this project include Camel Max 1200 Series Vac trucks to clean the sewer mains. Once mains are cleaned we will use our Aries Industries Sewer Inspection Trucks, with a Pathfinder steerable tractor and pan, tilt, zoom camera to complete our NASSCO Inspections onto our on board computers with software to match the client needs. All videos and files are saved to our cloud storage system and go through a 100% Quality Control review before submitting to the client. Project status can be monitored real time through our GIS system that our clients can access via computers or mobile devices.

A typical mainline inspection crew will include one camera truck with operator and one jet vac truck with operator. Pipe View can match client need based on size of projects and urgency.
