Executive Summary

First, I would like to thank Norm Johnson and the rest of the Village of Orland Park for the opportunity to bid on your project. I would also like to thank Mr. Johnson for his time in the walkout process, as I have gained a lot of valuable information from that meeting.

Six Underground Construction Company is a full service, turnkey contractor. Meaning we will be able to get both the design and construction part of any project completed – both on time and on budget. In the years our doors have been open we have completed many projects like yours, and feel this experience as well as our standards for quality and determination to get the projects done in the quickest time possible are in part of what has made us a successful company, and allowed us to remain in business for so long.

For anyone that is looking for a full service, turnkey contractor to come in and complete all the work is the best way to go. One person to go to get all of your questions answered, and one person to talk to in order to make sure all your concerns are addressed. Six Underground is that company, being able to focus on the design and construction part of the project while at the same time, keeping exact records of everything, and the comfort that each hand knows what the other one is doing. That being able to call one person and get a response instead of having many chiefs all talking to each other and that takes a toll on progress.

Our approach has always been that you get what you pay for. On the wall of our office is a banner that reads, "Make it Right", and all of our technicians, electricians, laborers and operators are brought into the company with that mindset. That if you're going to do something, do it right, this way you won't have to have someone else go back after you're gone to fix something – you know it was done right the first time.

The best way to choose a contractor is to talk to the people they've done business with, and get their take on it. Look at pictures of the contractor's work, or if possible actually go into the field and get a firsthand look at it. We document a lot of our work, and by that I mean take pictures of it, and we'd be more than happy to provide examples of our work for the Village to go over. We take pride in our work and we're happy to sign our name to any job we do, and we'd be extremely happy to sign our name to any job we do for the Village.

Construction and Installation

As was stated in the executive summary, we at Six Underground feel we have the best approach to getting the job done for you. We know exactly what it will take to install the fiber optic cabling, doing the underground construction work, and splicing the fiber, and will have the appropriate personnel on the ground (and in the air) to make sure that happens.

ISP/OSP Construction

Inside Plant Construction, or ISP, is something we're very familiar with. Our crews have the proper equipment, and proper training to handle any job. From re-wiring an apartment or condo, to a 20 floor high-rise, we have the right tools to handle all the wire pulling, conduit installation, and concrete and brick cores to get the job done effectively, and correctly the first time. Some of our more notable jobs in this category are the Sears Tower and Hancock Building in Chicago. Outside Plant Construction, or OSP, is our bread and butter. This involves all aspects of aerial and underground construction, including, but not limited to directional boring. Our outside plant experience stems from the years we've been working for companies like Comcast, AT&T, Wide Open West and Knology hanging strand and cable, directional boring, open cutting concrete and trenching, among many others.

Fiber Optic Wiring

Since its inception, Six Underground has been working on fiber optic and copper wiring projects. Our splicers have many years of knowledge and we have all the right tools – splicers, OTDR's, Fluke DTX 1800's, all regular hand tools – to complete any inside plant or outside plant project. We are also the first contractor a lot of our clients call for new installations in network cabling – Cat 5e and Cat 6 – because they know the quality of service they will get from us.

Warranty

We offer a one (1) year limited warranty on all work performed, and if there are any problems, we will fix them at no charge for that one year period. The warranty will be void if after we're done, someone comes in and re-splices the fiber splices.

The warranty is limited to craftsmanship only and does not cover any cut cables (either indoors or outdoors) that were hit during another contractors underground construction, or during any renovation in either building.

We offer no warranty, other than the manufacturer's warranty on any materials provided during the installation.

Ability to Perform

Six Underground is a complete turnkey contractor, with 2 aerial construction crews, 2 underground construction crews, and 3 in house splicers, 2 of which have fiber optic splicing capabilities. We would be able to commit our underground crew and fiber optic splicers to this project, and we have access to any number of sub-contractors for any specialty work.

In the 9 years we've been in business, we have not had any litigation brought against us, either by the Government or by any individual or business with whom we have done business. We also have no pending litigation whatsoever, and have never been behind paying any of our creditors. We also have a wonderful working arrangement with our subcontractors, all of whom are paid on time and in full.

Our insurance is up-to-date and has never lapsed. We currently hold a \$2,000,000.00 umbrella policy with up to \$1,000,000.00 per incident; have current workman's compensation insurance and automobile insurance. We also have current workman's compensation, general liability and auto insurance on our subcontractors.

References:

Ed Duda, Ernie Fenske, Pirtano Construction, Addison, IL
(630) 669-2387 – Ed Duda
(630) 669-2394 – Ernie Fenske

We have held a contract with Pirtano Construction for the past 10 years, completing many projects including directional boring, fiber optic cabling (inside and outside plant), and thousands of network and coax cabling jobs.

Chris Manley, Monumental Sports, Washington, DC
(202) 661-5035

We are the contractor of choice to do any fiber optic work for the Verizon Center, Washington Wizards, Washington Capitals, and Washington Mystics in Washington, DC. Monumental Sports owns the arena and the teams, and we came in and completely re-spliced all their fiber optic cable and provided the manpower and technical abilities to turn their arena into a fully functioning all digital arena.

Jeff Rittgarn, AACT Electric, Oswego, IL
(630) 878-0028

We've done several jobs for AACT Electric, and in July-August, 2010 we worked with AACT installing the new conduit and fiber optic cable at O'Hare Airport in Chicago. We also spliced and tested the cable when finished.

Susanne Ricci, Comcast, Chicago, IL
(773) 394-8702

We have completed too many jobs to list or even try to guess at for Comcast, as well as survey buildings for construction projects. Susanne can attest to our level of commitment and our quality of work and attention to detail.

James Henderson, Knology Cable, Panama City, FL
(850) 896-9802

In Florida, we've completed a re-wire job for Knology's Head-end installing new cable TV lines, data lines and systems, and fiber optic lines and systems. We've also done outside plant construction for them involving directional boring, aerial construction, and coax and fiber splicing.

Equipment:

To give the Village an idea of the types of equipment we have, this is a list that highlights some of the major equipment that may or will be used on this job, but it is not a complete list of all the equipment we own.

- (1) Vermeer 7x11a Directional Drill
- (2) Vermeer 16x20a Directional Drills
- Various Backhoes
- (1) Vermeer Flextrack 75 Vibratory Plow
- (1) Fluke DTX-1800 Tester
- (1) EXFO AXS-100 OTDR
- (2) Fujikura FSM-30s Fusion Splicers
- Various Bucket Trucks

Brief History

Six Underground came into existence after Joe Cosentino, the firm's president, was discharged from the United States Marine Corps with an Honorable Discharge. Over the years, our capabilities grew and we started taking more and more clients, all over the country, with much success. We currently do work for a number of city, county, and state governments, as well as many private firms. We also have contracts and sub-contracts with different companies like Comcast, Knology, AT&T, and Wide Open West.

Our staff includes:

- Joe Cosentino – Coax, Network Cabling, Fiber Optic Cabling, ISP/OSP Construction
- Terry McCurdy – Coax, Network Cabling, Fiber Optic Cabling, ISP/OSP Construction
- Kevin Hart – Coax, Network Cabling, Fiber Optic Cabling, ISP/OSP Construction
- Brandon Black – Coax, Fiber Optic Cabling, ISP/OSP Construction
- Joseph Mintzer – Outside Plant Laborer
- Aaron Redman – Outside Plant Laborer
- Steve Long – Crew Leader

Having worked on long haul and short extensions of fiber optic work, and splicing anything from a 512 count fiber trunk line to a 2-strand lateral, we've done most everything when it comes to fiber optic work. From building new fiber throughout school districts to re-working entire sports stadiums (Verizon Center in Washington, DC), we've got the knowledge and know how to get the job done right the first time. Our network wiring gurus have wired up entire hospitals, hotels, and state facility buildings with Cat 5e and Cat 6 cable. They are all masters of their craft when it comes to finding and creating pathways from patch panel to wall outlet. We are also a BICSI Corporate Member.

Methods of Installation

Directional Boring Conduits

The first part of our work for this project, will be to directional bore in the new conduit. Why is this important and why should it be done this way? The answer to that is to minimize surface disruption (not to destroy the grass, parking lot, or streets), which means less restoration work for the Village. Imagine having a big scar in the earth where the conduit was trenched in, or only having to worry about some 3'x3' pits to worry about.

Pulling the Fiber

During the process of pulling the fiber through the duct, we are going to install a tracer wire, as per the Village spec, but we are also going to pull in an extra pull rope so if the Village would ever like to use the duct to pull in something else, there is already an existing pull rope available. We do this on every job we do because it is simply the best and smartest way to do it.

Inside Plant Work

The second part will be running the conduits inside, along the route proposed in the bid documents. At each building, and below ground we will end the innerduct (HDPE pipe) and transfer to steel so that there is no chance of sabotage. For the Centennial Park side of the job, we are planning to utilize the existing conduit if it's possible (ie: the conduit is not damaged or obstructed below ground).

Fiber Splicing

The fiber splicing will be the last part of the project and will be scheduled ahead of time with the appropriate staff. At each building we will splice factory made pigtails into the newly run fiber in order to achieve the best possible connection. When you use mechanical splices you have a high reflection rate which will cause the fiber not to run as it should. When you install connectors in the field (instead of using ready-made pigtails), the gel that is in the connector tends to dry out over time and cause reflections also.

Materials

During my walkthrough I asked several questions regarding the materials we are planning to use for this job. There are 2 deviations we are going to use that work out to the Village's favor: (1), we are planning on using a 2" HDPE duct (innerduct) instead of 1 1/4", which will allow more expandability in the future; and (2) we are going to pull in a 24ct fiber instead of 12, which also allows for more expandability for the Village in the future. We currently have a surplus of these items and are providing them to the Village at the same cost as for the 1 1/4" and 12ct.

Project Timeline and Milestones

Event	Task	Time Allotted
Awarded Contract	Order materials Call in Locates to JULIE	2 – 3 days
Locates Are Ready	Start Underground Work - Directional Boring - Building Penetrations - Set Vaults	1 week
Outside Construction is Complete	Install corrugated innerduct inside buildings; install pull ropes through entire route.	1 day
Pathway is Created	Pull Fiber In with Extra Pull Ropes and Locate Wires	1 day
All Fiber is Run	Fusion Splice All Fibers	1 day
Fiber is Spliced	OTDR Testing of all Fibers (done same day as splicing – or next day depending on time of night)	2 hours
All Fibers are Tested	Turn system over to the Village.	1 day

This is a basic time table for the work to be performed, and several things may be going on at once.

Total time from the start of the project to the end of the project is estimated to be 15-22 days, however if we can get it done before that, we most definitely will try!

EQUAL EMPLOYMENT OPPORTUNITY

Section I. This EQUAL EMPLOYMENT OPPORTUNITY CLAUSE is required by the Illinois Human Rights Act and the Rules and Regulations of the Illinois Department of Human Rights published at 44 Illinois Administrative Code Section 750, et seq.

Section II. In the event of the Contractor's noncompliance with any provision of this Equal Employment Opportunity Clause, the Illinois Human Right Act, or the Rules and Regulations for Public Contracts of the Department of Human Rights (hereinafter referred to as the Department) the Contractor may be declared non-responsible and therefore ineligible for future contracts or subcontracts with the State of Illinois or any of its political subdivisions or municipal corporations, and this agreement may be canceled or avoided in whole or in part, and such other sanctions or penalties may be imposed or remedies involved as provided by statute or regulation.

During the performance of this Agreement, the Contractor agrees:

A. That it will not discriminate against any employee or applicant for employment because of race, color, religion, sex, national origin or ancestry; and further that it will examine all job classifications to determine if minority persons or women are underutilized and will take appropriate affirmative action to rectify any such underutilization.

B. That, if it hires additional employees in order to perform this Agreement, or any portion hereof, it will determine the availability (in accordance with the Department's Rules and Regulations for Public Contracts) of minorities and women in the area(s) from which it may reasonably recruit and it will hire for each job classification for which employees are hired in such a way that minorities and women are not underutilized.

C. That, in all solicitations or advertisements for employees placed by it or on its behalf, it will state that all applicants will be afforded equal opportunity without discrimination because of race, color, religion, sex, marital status, national origin or ancestry, age, or physical or mental handicap unrelated to ability, or an unfavorable discharge from military service.

D. That it will send to each labor organization or representative of workers with which it has or is bound by a collective bargaining or other agreement or understanding, a notice advising such labor organization or representative of the Contractor's obligations under the Illinois Human Rights Act and Department's Rules and Regulations for Public Contract.

E. That it will submit reports as required by the Department's Rules and Regulations for Public Contracts, furnish all relevant information as may from time to time be requested by the Department or the contracting agency, and in all respects comply with the Illinois Human Rights Act and Department's Rules and Regulations for Public Contracts.

F. That it will permit access to all relevant books, records, accounts and work sites by personnel of the contracting agency and Department for purposes of investigation to

ascertain compliance with the Illinois Human Rights Act and Department's Rules and Regulations for Public Contracts.

G. That it will include verbatim or by reference the provisions of this Equal Employment Opportunity Clause in every subcontract it awards under which any portion of this Agreement obligations are undertaken or assumed, so that such provisions will be binding upon such subcontractor. In the same manner as the other provisions of this Agreement, the Contractor will be liable for compliance with applicable provisions of this clause by such subcontractors; and further it will promptly notify the contracting agency and the Department in the event any subcontractor fails or refuses to comply therewith. In addition, the Contractor will not utilize any subcontractor declared by the Illinois Human Rights Department to be ineligible for contracts or subcontracts with the State of Illinois or any of its political subdivisions or municipal corporations.

Section III. For the purposes of subsection G of Section II, "subcontract" means any agreement, arrangement or understanding, written or otherwise, between the Contractor and any person under which any portion of the Contractor's obligations under one or more public contracts is performed, undertaken or assumed; the term "subcontract", however, shall not include any agreement, arrangement or understanding in which the parties stand in the relationship of an employer and an employee, or between a Contractor or other organization and its customers.

ACKNOWLEDGED AND AGREED TO:

NAME: Joe Cozzetta

SIGNATURE: 

WITNESS: _____

DATE: 8/15/12

**CERTIFICATION OF COMPLIANCE WITH THE
ILLINOIS PREVAILING WAGE ACT
(820 ILCS 130/0.01, et seq.)**

It is hereby stipulated and certified to the Village of Orland Park, that the undersigned Contractor shall pay not less than the prevailing hourly rate of wages, the generally prevailing rate of hourly wages for legal holiday and overtime work, and the prevailing hourly rate for welfare and other benefits as determined by the Illinois Department of Labor and as set forth in the schedule of prevailing wages for this contract to all laborers, workers and mechanics performing work under this contract. The undersigned Contractor further stipulates and certifies that he/she/it has maintained a satisfactory record of Prevailing Wage Act compliance with no significant Prevailing Wage Act violations for the past three (3) years. In accordance with Public Act 94-0515, the Contractor will submit to the Village certified payroll records (to include for every worker employed on the project the name, address, telephone number, social security number, job classification, hourly wages paid in each pay period, number of hours worked each day and starting and ending time of work each day) on a monthly basis, along with a statement affirming that such records are true and accurate, that the wages paid to each worker are not less than the required prevailing rate and that the Contractor is aware that knowingly filing false records is a Class B Misdemeanor.

**VILLAGE OF ORLAND PARK
CONTRACTOR'S CERTIFICATION
SEXUAL HARASSMENT, TAX & SUBSTANCE ABUSE**

Joe Cosentino, having been first duly sworn deposes and states as follows:
(Officer or Owner of Company)

Six Underground Construction Co., having submitted a proposal for:
(Name of Company)

Centennial Park Fiber Optic Project
(PROJECT)

to the Village of Orland Park, Illinois, hereby certifies that the undersigned Contractor:

1. has a written sexual harassment policy in place in full compliance with 775 ILCS 5/2-105(A)(4).
2. is not delinquent in the payment of any tax administered by the Illinois Department of Revenue, or if:
 - a. it is contesting its liability for the tax or the amount of tax in accordance with procedures established by the approved Revenue Act; or
 - b. it has entered into an agreement with the Department of Revenue for payment of all taxes due and is currently in compliance with that agreement.
3. is in full compliance with the Federal Highway Administration Rules on Controlled Substances and Alcohol Use and Testing, 49 CFR Parts 40 and 382 and that All employees is/are currently participating
(Name of employee/driver or "all employee drivers")
in a drug and alcohol testing program pursuant to the aforementioned rules.
- ☒ 4A. has in place a written program which meets or exceeds the program requirements of the Substance Abuse Prevention on Public Works Projects Act (Public Act 95-0635), and has provided a written copy thereof to the Village of Orland Park; or
- ☐ 4B. has in place a collective bargaining agreement which deals with the subject matter of the Substance Abuse Prevention on Public Works Projects Act (Public Act 95-0635).

(Check either 4A or 4B, depending upon which certification is correct.)

INSURANCE REQUIREMENTS

Please submit a policy Specimen Certificate of Insurance showing bidder's current coverage's

WORKERS COMPENSATION & EMPLOYER LIABILITY

\$500,000 – Each Accident

\$500,000 – Policy Limit

\$500,000 – Each Employee

Waiver of Subrogation in favor of the Village of Orland Park

AUTOMOBILE LIABILITY

\$1,000,000 – Combined Single Limit

Additional Insured Endorsement in favor of the Village of Orland Park

GENERAL LIABILITY (Occurrence basis)

\$1,000,000 – Each Occurrence

\$2,000,000 – General Aggregate Limit

\$1,000,000 – Personal & Advertising Injury

\$2,000,000 – Products/Completed Operations Aggregate

Additional Insured Endorsement & Waiver of Subrogation in favor of the Village of Orland Park

EXCESS LIABILITY (Umbrella-Follow Form Policy)

\$2,000,000 – Each Occurrence

\$2,000,000 – Aggregate

EXCESS MUST COVER: General Liability, Automobile Liability, Workers Compensation

Any insurance policies providing the coverage required of the Contractor shall be specifically endorsed to identify "The Village of Orland Park, and their respective officers, trustees, directors, employees and agents as Additional Insureds on a primary/non-contributory basis with respect to all claims arising out of operations by or on behalf of the named insured." If the named insureds have other applicable insurance coverage, that coverage shall be deemed to be on an excess or contingent basis. The policies shall also contain a Waiver of Subrogation in favor of the Additional Insureds in regards to General Liability and Workers Compensation coverage's. The certificate of insurance shall also state this information on its face. Any insurance company providing coverage must hold an A VII rating according to Best's Key Rating Guide. Permitting the contractor, or any subcontractor, to proceed with any work prior to our receipt of the foregoing certificate and endorsement however, shall not be a waiver of the contractor's obligation to provide all of the above insurance.

The bidder agrees that if they are the selected contractor, within ten days after the date of notice of the award of the contract and prior to the commencement of any work, you will furnish evidence of Insurance coverage providing for at minimum the coverage and limits described above directly to the Village of Orland Park, Denise Domalewski, Contract Administrator, 14700 S. Ravinia Avenue, Orland Park, IL 60462. Failure to provide this evidence in the time frame specified and prior to beginning of work may result in the termination of the Village's relationship with the selected bidder and the bid will be awarded to the next lowest bidder or result in creation of a new bid.
