Project Notes:

- 1.0 This estimate includes sediment excavation to reshape the slopes and haul-off any excess material to achieve an approximate minimum depth of 4-feet of water in as large a footprint as feasible.
- 2.0 This scope will include shaping of the perimeter slopes and installation of erosion control measures for long term stabilization of the slopes and embankment.
- 3.0 Construction access will be between two houses as shown on the attached exhibit. Note that this access may exceed what we understand to be a 10-foot easement in this area. Turf restoration of the access will be provided.
- 4.0 No allowance for disposal of contaminated or hazardous materials has been provided for in this estimate. Disposal rates assume material can be disposed of at a CCDD facility. Should the Village provide a disposal location within a 10-mile radius of the project site the disposal fees can be reduced by \$20 CY depending on disposal site requirements.
- 5.0 No allowance for long term native area maintenance and monitoring is provided in this estimate. For budgeting purposes, an allowance of \$8,000 year is recommended but should be verified through defining scope and performance standards.
- 6.0 We have not provided as-built drawings as part of this estimate. It is our understanding that the work detailed below is considered maintenance and will only require USACE notice. Permit drawings fees are not provided in this estimate.
- 7.0 This estimate specifically excludes: any special insurance (waiver of subrogation, pollution liability insurance), and testing including QC Q.A, handling or disposal of hazardous materials or non-hazardous special waste material, & compaction or material testing.
- 8.0 Quantities represented herein are estimated for pricing purposes. Actual quantities will be based on site conditions experienced during construction.
