The software interface is displayed across three devices: a laptop, a tablet, and a smartphone. The laptop screen shows a dashboard with the following sections:

- Service Reminders:** 5 Due Soon, 9 Overdue.
- Fuel Costs:** A bar chart showing fuel costs for Aug, Sep, Oct, Nov, Dec, Jan.
- Recent Comments:** A list of comments from users like Luke Matthews, Maria Goshen, Robert Watkins, Kalia Linden, and Juan Villar.
- Open Issues:** 12 Open, 4 Overdue.
- Inventory:** A section for tracking vehicle inventory.
- Vehicle Locations:** A map showing the location of vehicles.
- Inspection Submissions:** A section for tracking inspection results.
- Service Costs:** A section for tracking maintenance costs.

The tablet screen shows a similar dashboard with a 'Total Costs' chart and 'Cost Per Meter' data. The smartphone screen shows a detailed inspection report for 'Reflective Triangles' on a 'Saber Equipment' vehicle, dated January 27 - February 2, 2019. The report includes a 'Fail' status and a list of items to be replaced.

DVIR Workflow

Driver inspects vehicle and records findings in mobile app or web browser.

Results appear in Fleetio and the fleet manager schedules repairs.

Vehicle repairs are completed and recorded against the original inspections report.

The driver confirms the issue is resolved in their next inspection.

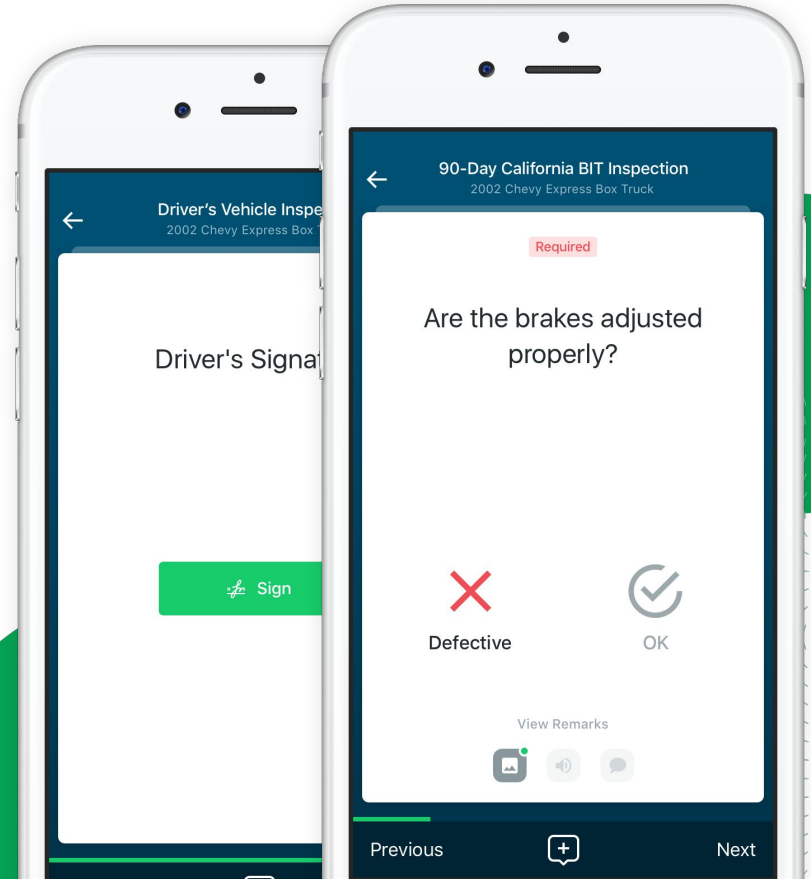

The vehicle is road-ready with a fully compliant inspections report.

Electronic Vehicle Inspections

1. Administrators create custom inspection forms
2. Drivers complete inspections using a mobile device
3. Failures are instantly reported along with photos & comments
4. Issues are addressed immediately and fleet operations are safer and more productive

Avoid stockouts with low inventory alerts

Always know how much you have in stock, track how much you've used, and receive notifications when it's time to reorder, well before the last second.

Reduce unnecessary costs through rightsizing

Rightsize your inventory with clear cost insights and actionable data, as well as record order history and compare vendor prices, so that you're never spending more than is necessary on parts.

Increase efficiency and optimize space

Integrate digital tracking to know exactly where all of your inventory is – down to the aisle, row and bin – and stay organized to streamline maintenance workflows and manage bulk operations.

Track how your vehicles and equipment are being used

Keep tabs on utilization for each and every vehicle so you can adjust on the fly and make the most of your vehicles and equipment.

- Average mileage per day (utilization) by vehicle or group
- Vehicle assignment history across operators and vehicles
- History of status changes (in-shop, out-of-service, etc.)
- Audit trail of changes to all asset records (service, parts, issues, etc.)

Ensure your fleet is safe and compliant

Find out who's completing required inspections, ensure in-service vehicles are being inspected regularly and spot common defects across your fleet.

- All inspections completed and by whom
- View all reported defects, identify trends

Equipment Management

- Centralize all fleets assets
- Improve tracking & accountability of equipment
- Maintain control of your equipment from anywhere

The screenshot displays the Hoofi Dynamic Equipment Management interface. The left sidebar shows navigation options: Dashboard, Vehicles, Equipment (marked as NEW), Inspections, Issues, Reminders, Service, Fuel, Contacts & Users, Parts & Inventory, Places, Reports, and Integrations. The main content area shows the details for a piece of equipment named 'MAG-02'. The 'Details' section includes fields for Name (MAG-02), Type (Blower), Serial Number (85203892195566), Year (2018), Brand / Make (Stihl), Model, Ownership (Owned), and Warranty Type (Extended). The 'Check In / Out' section shows the equipment is currently 'Unassigned' with 'Check Out' and 'Check Out To...' buttons. Below this is a 'History' table listing check-in and check-out events for Kim Gordon, Mark McMahon, and Penelope Smith. The 'Last Known Location' section features a map showing the location near Ruid Hills, with a marker indicating the equipment's position.

Name	Status
MAG-02	Unassigned

Name	Type	Serial Number	Year	Brand / Make	Model	Ownership	Warranty Type
MAG-02	Blower	85203892195566	2018	Stihl		Owned	Extended

Name	Action	Time
Kim Gordon	Checked in	5 hr
Kim Gordon	Checked out	Yesterday
Mark McMahon	Checked in	Sep 5
Mark McMahon	Checked out	Sep 2
Penelope Smith	Checked in	Aug 30
