Dennis,

Here are my numbers and scope of work for the wall sign.

**Rework Wall Sign as follows:**

- a. Produce new aluminum fabricated letters reading "Orland Park" to match the existing font and size painted black
- b. Produce new 47" logo fabricated using aluminum with a depth of 2" painted black.
  - o This is not a simplified flat panel with two-tone paint...but rather a piece that has fabricated relief that allows the wall to show through the various elements.
  - o A flat panel design would be cheaper.
- c. Remove old logo and "Palos" letters.
- d. Install new letters and new logo.
- e. Lift equipment is required and included in the cost below.
  - o This equipment will need to be out into the grass area to complete the work.
  - o Since this grass area will be excavated sometime soon for the new ring road....I have not included any repair costs.
- f. Removed items to be taken off the site for recycle/disposal.

**Price.....\$5880**

**Permit:** I assumed that the permit will be handled by yourself, therefore I have not included any permit work or fees in the costs.

**Art file:** I don't have accurate art files on the logo from you yet so I had to speculate on a few things.....if you have good artwork (vector based like an .ai or an .eps) that will help me.

I am investigating an alternate fabrication method of the Logo that ,might save some \$\$ ....I can let you know what I find.....but the down side is that it would take longer to get completed.

Let me know....I can submit that as a formal proposal on letterhead for your use.
