## Operating History:

In 1889, Constantino Vitale started his fireworks company in Pietramelara, Italy. In 1920, he immigrated to the United States through Ellis Island, making a home for his family and business in New Castle, PA - which would later become known as "The Fireworks Capital of America".

Constantino's son, Rocco Vitale Sr., began leading the expansion of the New Castle facilities - which were also briefly used to manufacture explosives for the U.S. Navy during World War II. Many of these buildings still stand today across the street from the 20,000 square-foot corporate headquarters.

Four generations of the Vitale family have grown Constantino's vision by training new staff in the old family ways, selecting the safest and most innovative products from global supplies, and creating millions upon millions of Oohs and Aahs on an annual basis.

Stephen Vitale, the great-grandson of Constantino, took the helm in the early 1990's by becoming President & CEO. It was at that time the company took the name "Pyrotecnico" to reflect its expanding technical proficients and variety of products that it uses to complement fireworks displays.

## Operating History, Con't:

Since 1993, the company has gained global presence, performing more than 3,500 displays each year, employing almost 400 personnel. The variety of Pyrotecnico's creative offerings has also increased under Stephen's tenure. Pyrotecnico launched its live entertainment and touring division, Pyrotecnico FX, which offers clients a variety of displays and effects including flames, lasers, close proximate atmospheric effects such as confetti/streamers.

Pyrotecnico has created displays for events ranging from municipal/governmental celebrations, private events, athletic games/events, award shows, music festivals/concerts/tours, as well as film and television productions.

Stephen has assembled an incredibly passionate team of approximately 200 full-time and part-time employees and thousands of freelance technicians and drivers that rally behind Pyrotecnico's purpose - CREATING SAFE OOHS AND AAHS!

### PYROTECNICO'S BACKGROUND

"While we've become one of the premier fireworks and special effects companies in the world, we cannot lose sight of what has gotten us here: a commitment to innovation that impacts audience visually and emotionally, attention to detail, listening to clients, and a serious regard for safety. We take pride in these skills and use them to provide the best possible display for each of our client's events."

- Stephen Vitale, Pyrotecnico President & CEO

## Display Content:

Pyrotecnico's proposed display complies with the specifications requested by the Village of Orland Park, IL in order to accomplish a top-tier fireworks production. The following proposal follows the guidelines set forth by the Village, including an all aerial display with no lower level items that may be visually obscured by tree lines. Additionally, the removal of 10" shells not only allows for a higher quantity of shells overall, but also provides more space for the event's overflow parking area to the north of the firing site.

Just as the Village of Orland Park deservingly prides itself on being one of the best places to live, Pyrotecnico's design team (with an in-house soundtrack producer) prides itself on unique awe-inspiring designs that leave our clients shinning in their audiences' eyes. The design team will work in tandem with the Village to ensure the display the soundtrack and design is approved prior to execution.

We take pride in our ability to “layer” the sky with vivid surprises at varying heights and widths, painting the entire sky into beautiful scenes of color. Your show will be unique and precise, with a timeline that will include an opening mini-finale of bursts to kick off the display, followed by a body filled with unique scenes and special effect barrages, and concluding with a grand finale that will light up the sky like nothing your audience has ever seen!

\*Maximum shell heights will vary for each individual display.  
•On average, shells will reach 100' of elevation for every inch in shell diameter.
