### RECIPIENT:

#### Village of Orland Park

1st Avenue  
Orland Park, Illinois 60462

### Estimate #3042

Sent on Jul 21, 2025

**Total \$9,750.00**

### Project summary

**\*\*Project Summary – Village of Orland Streets Sealcoating (1st, 2nd, and 3rd Ave)\*\***

This project consists of sealcoating three residential streets—1st, 2nd, and 3rd Avenue—in the Village of Orland. A single coat of commercial-grade asphalt sealant will be applied via spray application to all asphalt surfaces. The sealant is free of coal tar and other carcinogenic substances banned by Cook and Will Counties, ensuring compliance with all local environmental regulations. The work will be completed with proper traffic control measures and all areas will be cleaned and prepped prior to application to ensure optimal adhesion and finish.

Product/Service	Description	Qty.	Unit Price	Total

### Reviews

#### Carlos Garcia

Seal coating for my driveway was done quickly and it looks great! I would recommend thier services to anyone who needs paving/seal coating done!

#### Kelly Richardson

We recently had our driveway sealcoated and are very happy with the results! The finish looks great and really freshened up the curb appeal. I especially appreciated that they used two coats for better coverage and durability — a detail that really sets them apart. Highly recommend!

#### Richard Burridge

Very responsive and did great work.

#### TERMS:

All credit cards accepted 3.5% processing fee applied

All asphalt surfaces will ultimately crack, including those that are resurfaced. Buroff Outdoor Services does not guarantee their work against cracking, which is a natural occurrence outside the contractor's control. It is impossible to guarantee against cracking due to temperature, moisture, and soil conditions (which might cause cracking). The customer is aware that this is a risk that comes with the job. Areas with flaking sealer, standing water, or moss may continue to fail after the seal coat is applied. The hot rubberized crack sealer will not be used to fill surface cracks or degraded regions. Large cracks are those that are 1/4" or wider in width. Following completion, vehicles should be removed from the sealed asphalt for at least 24 hours. Sprinklers on the job site's perimeter should not be turned on for at least 48 hours after the job is completed. During or after the job, Buroff Outdoor Services is not liable for any water damage caused by the customer's direct fault. Buroff Outdoor Services is not liable for any concrete damage or surface restoration in and around the work area. Buroff Outdoor Services reserves the right to work with any subcontractors. All agreements are subject to any unforeseen events or delays. Any additional material or labor required to finish any portion of this proposal as a result of revisions or mistakes made by other contractors will be done only upon written order and will be charged separately. Any additional material (asphalt, stone, crack sealer, seal coat) ordered after the aforementioned contract agreement will be completed only upon written order and will incur a fee. If a cancellation notice is not received within three business days following the contract agreement, Buroff Outdoor Services will assume that the customer has accepted the work under the terms of the contract. Any cancellation of this contract after the first three business days of contract acceptance may result in a partial charge to Buroff Outdoor Services to cover any planned preparations and supplies already ordered or applied on the construction site. Payment in full is expected upon completion of the work. All material and work is guaranteed to be as specified and warrantied for 1 year. All work to be completed in a professional manner according to standard practices. Any alteration or deviation from above specifications involving extra costs will be executed only upon written orders, and will become an extra charge over and above the estimate. All work is covered by workman's compensation, general liability insurance, and bonded.
