Orland Park, IL 60462

Project: H17837CRE
Work Order: 15952799
EPS Project: 19FRD123

Re: Relocation of overhead electric facilities along **151st St.**

Dear Sean,

This letter is in reply to an inquiry regarding the **Village of Orland Park's** request to relocate ComEd's overhead electric lines along **151st**. More specifically, the subject electric lines are currently situated along **151st, in front of the fire station located at 9790 151st Street**.

The preliminary estimated cost to relocate the existing overhead facilities is approximately **\$194,686**. This is a **non-binding, high-level cost estimate prepared without an engineering design** for preliminary budgetary purposes only and is not a final cost for ComEd to provide any work to relocate the subject facilities. The final costs may be higher or lower depending on mutual agreement of facilities relocated, final engineering design, difficulty of work area and what the accepted contract bid is for performing the work. The village should take note that final costs will be based off the total actual charges that ComEd incurred to complete this project. This cost estimate is good for 60 days from the date on this letter.

General Assumptions:

- This estimate is for the relocation of ComEd electric facilities only. The village will need to contact other utilities for their relocation cost, if applicable.
- This estimate is based upon current tariffs with no escalation.
- Construction estimate, and schedule is based on normal 40-hour workweek, without overtime, weekend, or Holiday work.
- Estimate does not include delays related to permitting needs required by governmental entities including municipalities or other optional facilities charges.
- Project scope provides no additional capacity, contingency or redundancy above what is specifically stated. Change in scope will result in additional charges. Estimate does not include any enhanced reliability.

Others Responsibilities:

- Other's will be responsible to obtain all permits and easements/ROW at the other's expense as necessary to support ComEd's construction schedule and installation methods, including but not limited to trimming without restriction.
- All ComEd customers which require service entrance modifications (overhead to underground or relocated overhead service drops) are the responsibility of the village.
- Each switchgear being installed will require a minimum 10' x 22' parcel. This will have to be discussed in detail with the property owners.
- No landscaping or beautification will be provided by ComEd, only rough grade back fill of all areas disturbed by the ComEd construction removal and installation of equipment. All restoration, finished grading, sod and/or seeding is to be completed by other's within both the right-of-way and private property areas.
- Soil remediation will be the responsibility of others.
- Other's to provide ComEd with all required easements for underground facilities being installed.
- All trees, shrubs and vegetation to be removed by other's in the proposed easement areas. Grade to be within 4" of final grade before ComEd starts its work.
