Re: change order REQUEST Orland Park John Humphrey Complex

Provide and install new vault for 4" vault **\$4,300.00**

Install and program flow meter for the Hunter HCC control system **\$4,125.00**

Install a 208volt to 230v rated 3ph packaged Grundfos pumping with VFD system this pumping system can drop to 190v. **\$5,091.00**

This manufactured packaged pump system replaces the 230volt rated system component built system that will fault out at 200volt. (I am only charging the cost difference between the two pumping systems.

We are installing for irrigation 4" ductile from concession building to first field in lieu of 2-1/2" PVC. We are oversizing pipe just in case expansion of system is ever needed or if multiple valves need to operate. Installing Ductile in lieu of PVC will be much more robust especially under hardsape surface and initial piping discharge under building. **(NO CHARGE)**

Exclusions:

Spoil removal from site
