Title
Harris Enterprise Resource Planning - Software Maintenance

History
The Innoprise Community Development annual software maintenance fees paid in January were prorated for six months in anticipation of the new Tyler EnerGov system going live in July 2019. The EnerGov go-live date has been revised to September 2019, and staff has requested extending the Innoprise Community Development software maintenance an additional six months. The project change request amount for this is $5,700.

On June 17, 2019, this item was reviewed and approved by the Technology, Innovation and Performance Committee and referred to the Board for approval.

Financial Impact
Business Information Systems Department has funds available in the 2019 budget included $68,000 in computer software maintenance for this expenditure.

Recommended Action/Motion
I move to approve of the Innoprise Community Development software maintenance expenditure increase at a cost not to exceed $5,700.
