Title/Name/Summary  
COVID-19 Update

### History

The CDC has been responding to an outbreak of respiratory disease caused by a novel (new) coronavirus that was first detected in China and which has now been detected.

The complete clinical picture with regard to COVID-19 remains unknown. Reported illnesses have ranged from very mild (including some with no reported symptoms) to severe, including illness resulting in death. There are ongoing investigations to learn more. This situation is ever changing and information has continued to be updated as available.

The CDC has been implementing its pandemic preparedness and response plans, working on multiple fronts, including providing specific guidance on measures to help communities respond to local spread of the virus.
