Title
Water Play Unit Design at Centennial Park Aquatic Center

History
Staff have been working with three companies to provide design options for a new water play unit to be installed in the zero-depth pool at the Centennial Park Aquatic Center at the end of the pool season. The three companies are Imagine Nation, White Water, and Vortex. They have supplied us with a variety of options to fit our price range. (All companies have Government Pricing.) The installation will be bid (average installation cost from \$22,000 to \$34,000). Staff recommends Water Play Solutions unit from Imagine Nation, Inc. for the water play unit because their design provides a very unique look, very high quality and the most features and amenities while keeping the cost within the allocated budget for this replacement unit. We will also plan for possible additional amenities to be added in future years as indicated on the prints. \$185,000.00 was allocated this year for the unit and installation.

Vortex			\$148,000.00
White Water	Option 1 - HS200	\$145,000.00	
	Option 2 - HS100	\$80,000.00	
	Option 3 - HS100 w Bucket	\$96,000.00	
Imagine Nation, Inc.		\$149,129.25	

On June 16, 2014 this item was reviewed by the Parks & Recreation committee, recommended for approval, and referred to the Village Board of Trustees for consideration.

Financial Impact
Funds for this project were budgeted in the Capital account 283-4005-470700, \$185,000.00.

Recommended Action/Motion
I move to approve accepting the quote from Imagine Nation, Inc. at a cost not to exceed \$149,129.25 for the water play unit at Centennial Park Aquatic Center.
